PROJECTS

Touchscreen Microcontroller (Spotify WEB API) / Golden, CO

Sep. 2026 – Sep. 2026

- Created a Spotify display using a CYD ESP32 with a progress bar, pause, skip, rewind buttons, and song information.
- Built in C++ to transform my love for music into an actionable study on memory-constrained rendering, OAuth2 token refreshes, and hands-on electronics.

NDA Python Data Visualization & Analytics / Antibes, France

Jan. 2026 – Apr. 2026

- Transformed high-volume CSV files into actionable visual assets with Python (including matplotlib and pandas).
- Automated the generation of dynamic bar charts and trend-based line graphs for over 100,000+ data points.

Polar Shift - Published PC Video Game / Winston-Salem, North Carolina

Jan. 2025 – May 2025

- Acted as project manager for a 4-person indie studio, made in Unreal Engine 5.4 with over 150+ Wishlists.
- Handled the entire Steam publication process, including store page buildout, graphic design, and release logistics.

SKILLS

PROGRAMMING LANGUAGES:

Python, C++, HTML, CSS.

TOOLS & PLATFORMS:

Unreal Engine, Steam Publication, AutoDesk 3ds Max.

CERTIFICATIONS:

Google AI Essentials, AutoDesk 3ds Max User.

SOFT SKILLS:

Agile Teamwork, Problem Solving, Adaptability.

WORK EXPERIENCE

Shift Leader / Coldstone Creamery, Kernersville, North Carolina

May 2026 – July 2026

- Trained 5+ Employees in food safety, money handling, and customer service with supplemental, custom made excel and word documents.
- Tackled large scale catering orders serving 20+ individuals, securely opening and closing shop, along with individually manning the store during over 75% of scheduled shifts.
